### **BRIEF BACKGROUND OF METROPOLITAN TRADING COMPANY:**

Metropolitan Trading Company (MTC) is an entity owned by the City of Joburg Metropolitan Municipality (the City) tasked with operating Johannesburg Broadband Network (JBN).

The aim of the JBN is to ensure the availability of affordable broadband connectivity throughout the City, which will support socio-economic development through accelerated growth, expanded productivity leading to enhanced quality of life for all. JBN is also aimed to lower the City's own operating costs whilst increasing access to telecommunications services for residents in the City. This will stimulate economic development in the City, reduce ICT costs and provide available broadband access to the industry.

The primary objectives of MTC are:

- To increase the competitiveness of existing businesses within the City.
- Increase the usage and penetration of high-speed broadband connectivity.
- Facilitate the growth and development of new and existing Information and Communication Technology (ICT) businesses.
- Improve the marketability of Joburg as an investment destination.
- Increase and accelerate access to the benefits of internet-based communication to achieve digital inclusion.
- Reduce the operating costs to the City and improve service delivery.

MTC is currently embarking on a recruitment process for the purposes of capacitating its resources to enable seamless operations.

### **Educational Requirements and Experience**

- Grade 12 and A+, N+, MSCE, CCNA, ITIL foundation
- At least three (3) years' experience within the technical support field
- Ability to work under pressure
- Good interpersonal and communication skills
- Computer literate

**Short Detailed Job Description:**

- Dialogue with N O C during online integration phase or upgrade/extension operation.
- Interpret and collect results for evaluation in case of problem.
- Report any anomaly related to site commissioning operation using ad-hoc process and tools.
- Handle the site elementary acceptance phase; perform the tests relevant to this phase and provides the relevant reports.
- Manage supplier acceptances on new products and software deliveries.
- Provide input into customer reports and attend regular review meetings, both internally and externally.
- Provide support for customer demonstrating new features and problem fixes etc.
- Analyse the problems encountered on the site and any solutions in accordance with Service Level Agreement (SLA).
- Operate on sites at callers' request to repair faulty sites (corrective or palliative solution) as quickly as possible.
- Support on specific operations (migrations).
- Establish and maintain the production tool chain in accordance with BU specifications.
- Reproduce, broadcast and archive generic software and associated tools.
- Maintain and follow a production load plan consistent with new releases (and maintenance releases) introduction plan within customer's networks.
